Promotional Gadgets

WITH BRANDING

Promotional gadgets with a logo are one of those marketing tricks that really work. Although they may seem like a trifle, their impact on brand recognition and customer relations is gigantic.

INCREASED BRAND RECOGNITION

Gadgets are like advertising GPS – they help find their way to your brand when a customer finally decides to make a purchase. According to Promotional Products Association International, 83% of people remember the company name after receiving a promotional gadget. It means, that if someone is sipping coffee from your mug, they may forget about deadlines, but they definitely won't forget about your brand!

83%

UV PRINTING UV360°

UV 360 is a modern method of rotary direct marking on products with cylindrical shape like bidons and bottles. Each product is fixed in the machine with special holders.

BUILDING RELATIONSHIPS WITH CUSTOMERS

Nothing builds relationships like a small but thoughtful gift. The Global Advertising Specialties Impressions Study says that 58% of people give a positive review to companies that give them promotional items. It's like giving a small gift - no one will say no, and customers feel appreciated (and will remember you for longer than with a standard business card).

58%

PAD PRINTING

Pad printing is one of the most popular colour marking methods. It involves the application of ink with a flexible rubber pad from a previously prepared matrix.

DTF

DTF is an indirect printing technique that transfers digital printing from film to product. The film is coated with powdered adhesive. The whole thing is activated in a heating tunnel. The print prepared in this way is transferred to the desired surface and then indented into the product using heat transfer presses..

79%

LONG-LASTING EFFECT

Gadgets are an investment that really pays off. According to the Global Advertising Specialties Impressions Study, 79% of people keep a gadget for at least a year. So even if no one remembers what you said during the meeting, don't worry - your logo will remind you of your company for a year when a customer reaches for a shopping bag, a power bank or an umbrella on a rainy afternoon.

UV PRINTING

UV is a modern and fast method of direct printing. The image is printed with special inks directly on the surface of the labeled gadget and then hardened with UV rays.

PROFESSIONAL IMAGE

A high-quality promotional gadget is like a well-tailored suit – it emphasizes professionalism and inspires trust. According to Advertising Specialty Institute, 83% of people perceive a company as more trustworthy when they receive practical gifts from it. An elegant pen or a stylish mug with an interesting logo can make you seem like an expert... even if the person using the gadget has no idea what exactly your company does. ;)

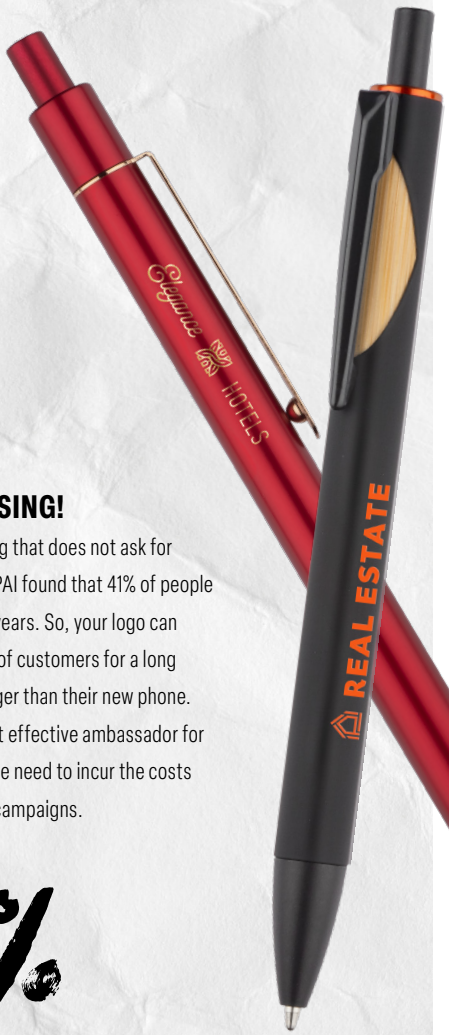

83%

LASER ENGRAVING

Engraving is characterised by extreme precision. Even the smallest element of a logo can be reproduced. This marking involves removing the top layer of the product, exposing its underlying texture.

FREE ADVERTISING!

Gadgets are advertising that does not ask for additional payment. PPAI found that 41% of people use gadgets for 1 to 4 years. So, your logo can be present in the lives of customers for a long time - maybe even longer than their new phone. Gadgets are a quiet but effective ambassador for your brand - without the need to incur the costs of further advertising campaigns.

41%

Technology

Modern gadgets that make life easier and stylish! In the Technology section, you will find a wide selection of products, that are perfect for everyday use, travel or work. If you are looking for practical accessories, that combine functionality with modern design, you like innovation and value comfort, our offer will surely delight you. Borosilicate glass is also more transparent than traditional glass, which translates into better visibility of the container's contents. A key advantage is that borosilicate glass is more resistant to temperature changes than traditional glass, meaning that the containers will not crack when exposed to heat.

POWER BANK WITH SOLAR PANELS

HOW DOES IT WORK?

Solar-powered products have a built-in solar panel that converts the energy from the solar light rays into electricity.

WHAT ARE THE ADVANTAGES OF SOLAR ENERGY?

It is full of benefits! Here are some reasons why it's so amazing:

- Sunlight is a renewable energy source - meaning it will never run out.
- It is easy to generate - solar panels are all you need and they do not take up much space.
- It is quiet – photovoltaic or solar cells do not make any noise at all, and they convert sunlight into usable electricity. Thanks to this, we can enjoy peace and quiet!
- It does not pollute the environment. Solar power plants do not emit harmful substances into the atmosphere when they are being used or charged.

OEKO-TEX Standard 100 is an international certification system for textile products, confirming that they have been tested for harmful substances and are safe for human health. Products bearing this certification must meet strict criteria regarding the content of chemicals, such as pesticides, heavy metals, or formaldehyde, and can be used even by individuals with sensitive skin, including infants.

The Global Recycled Standard (GRS) is an international certification awarded to products containing recycled materials. It covers the entire production process, including raw material traceability, the limitation of chemical substances, and compliance with social and environmental requirements. The GRS certification ensures transparency and sustainable practices in the supply chain.
